

Fused Coupler, Low Loss, C+L or S Band

Key Features

- Ultra low typical <0.05 dB excess loss
- Zero-slope design for low wavelength dependence
- Sub-miniature 28 mm length package option available
- Wide range of regular parts available
- 4 W power handling
- Proven reliability

Applications

- Signal monitoring in C+L band EDFA or RAMAN amplifier
- Network monitoring
- Network expansion
- Small form-factor modules (select housing option 1, 2 or 4)

The JDSU fused coupler, low loss, C+L or S band enables the accurate splitting and monitoring of optical signals in single-mode fiber. JDSU proprietary manufacturing technology provides uniquely low excess loss and wavelength dependence, along with low polarization and temperature dependence for both signal and tap ports.

These high performance regular parts are available in a wide variety of tap ratios, wavelength ranges, housing and connector options and can therefore be readily specified in a wide variety of applications, enabling rapid design cycles and new project builds.

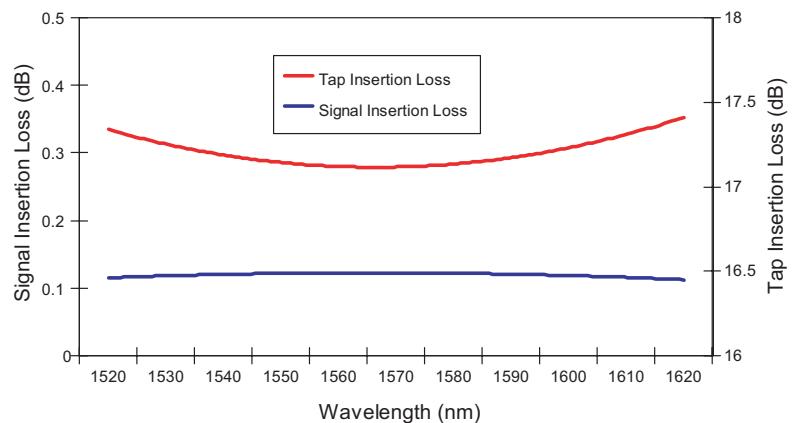

Compact housings such as the subminiature, miniature and the Ø 0.9 mm slim package enable reduced network (real-estate) costs by facilitating very small form-factor modules.

Reliability is assured through extensive Telcordia GR-1221 testing.

1. Insertion loss over operating wavelength range (not including PDL and TDL).
2. In 2x2 couplers with a coupling ratio of 20% or lower, insertion loss is not specified for launch through second input port (P4).
3. Change in insertion loss over the operating wavelength range.
4. Change in insertion loss over all input polarization states.
5. Change in insertion loss from -5 to 75 °C.
6. Insertion loss for housing option 4 is 3.4 dB (maximum).

Environmental qualification	Telcordia GR-1221	

1. For wavelengths within ±5 nm of the specified range performance will be maintained for signal path insertion loss, PDL, TDL, directivity and return loss. The only parameters to increase will be tap insertion loss and WDL. Maximum values of increase are:
 Tap ratio=1%, maximum tap insertion loss and WDL increase=0.15 dB
 Tap ratio=2 to 9%, maximum tap insertion loss and WDL increase=0.10 dB
 Tap ratio=10 to 50%, maximum tap insertion loss and WDL increase=0.08 dB.
2. For 1x2 and 2x2 configurations.
3. TDL is specified from -5 to 75 °C.
